

Algorithmic Impact Assessment (AIA)

(Pre-Build Stage)

Assess risks and societal impact *before* developing or procuring an AI system.

1. What service will be delivered?

2. Who is affected? Are vulnerable groups involved?

3. Is this high-risk (e.g., law enforcement, healthcare)?

4. Can results be explained to non-technical users?

5. Is there a way for users to contest decisions?

6. Rate the project across criteria like bias, harm, and reversibility.
